# Highlights of GSA's Flexible Requisition and Acquisition Methods

## Requisitioning from GSA

GSA Global Supply™ offers products that meet the recurring needs of the federal government. Because GSA Global Supply has already procured the most in-demand products on the government's behalf, your order is a simple requisition or government-to-government (G2G) transaction. As a result, you are not required to consider multiple sources. Requisitions, regardless of size, satisfy all Federal Acquisition Regulation (FAR) requirements, environmental initiatives, trade agreement policies, socioeconomic goals, AbilityOne mandates, and executive orders. Plus, you can order using your Activity Address Code (AAC), Department of Defense Activity Address Code (DoDAAC), or government purchase card. Standard global delivery is included with most orders.

This catalog features some of GSA Global Supply's most popular products. To shop from our complete offering, visit [www.GSAGlobalsupply.gsa.gov](http://www.GSAGlobalsupply.gsa.gov).

For more information about ordering from GSA Global Supply, see page iii of this publication.

## Special Order Program

If your requirements cannot be met through [www.GSAGlobalsupply.gsa.gov](http://www.GSAGlobalsupply.gsa.gov) or by the products in this catalog, we can meet your complex mission-critical commodity requirements through our Special Order Program (SOP). SOP provides full-service acquisition support to help you find and buy products that require specialized attention. Through SOP, you have access to a wide variety of items, including safety and security products, maintenance and repair supplies, construction materials, tools, appliances, office equipment, and much more. Our certified contracting professionals offer acquisition-management services that completely support all phases of a project: pre-solicitation, pre-award, award, and post-award. SOP complies with the Federal Acquisition Regulation (FAR) and other applicable federal policies.

For more information on SOP, contact us at [SpecialOrderProgram@gsa.gov](mailto:SpecialOrderProgram@gsa.gov).

## Ensuring Reuse with GSA Personal Property Management

Screening available excess personal property is the federal government's priority source of supply. With today's increased emphasis on budget reductions, use of excess is a great way to save procurement dollars. Also, reusing excess property has become a source of both pride for the government and proven benefits for the environment. Remember, **reuse is recycling**. To help you acquire the excess property your agency needs, GSA offers GSAXcess® (accessible via [www.gsaxcess.gov](http://www.gsaxcess.gov)), the personal property tool that supports the excess property utilization program within the federal government. At GSAXcess, reporting, searching, and selecting excess property is convenient and user-friendly.

## Purchasing from a GSA Vendor

In addition to requisitions from GSA Global Supply, customers can purchase through GSA's Multiple Award Schedules (MAS) program. If you do, you'll receive high-quality products and services directly from vendors at volume-discount pricing. Because of established contractor relationships, the MAS program offers short procurement lead times and low administrative costs compared to open-market purchases – resulting in simple, streamlined procurements. You can also meet small-business goals while promoting compliance with various environmental regulations. GSA requires all MAS contractors to accept the GSA SmartPay® 2 purchase card for products. To learn more, visit [www.gsa.gov/acquisitionsolutions](http://www.gsa.gov/acquisitionsolutions).

## Federal Strategic Sourcing Initiative (FSSI)

Under FSSI, GSA negotiates Blanket Purchase Agreements (BPAs) to provide extra savings for federal buyers. GSA has expanded the number and scope of FSSI categories to offer you substantial savings and greater convenience. These categories include Office Supplies (third generation); Janitorial and Sanitation (JanSan) products; and Maintenance, Repair, and Operations (MRO) supplies. We're also offering FSSI solutions for Building Maintenance and Operations (BMO) services. The evolving GSA Global Supply business model combines the safety and simplicity of requisition buying with the financial savings inherent in FSSI. To learn more, visit [www.gsa.gov/fssi](http://www.gsa.gov/fssi).

# Environmental Products from GSA Global Supply™

GSA offers a variety of environmentally sustainable products to help customers implement federal acquisition policies. These products comply with Federal Acquisition Regulation (FAR) Part 23, executive orders, and laws that require the purchase of environmental products and services. Ordering activities must give preference to products that have certain environmental attributes – including recycled and post-consumer material, energy efficiency, and biobased ingredients – and those with less-toxic or hazardous constituents.

However, the environmental purchasing requirements are only part of the rationale for buying environmental products and services. As the largest purchaser in the United States, the federal government can become a better steward of the environment by purchasing sustainable products, helping to minimize the negative impact on the environment.

In this catalog, environmentally sustainable items are identified with a variety of symbols, depending on the relevant attributes. Online, these items display the same icons. To find the icons easily online, visit the GSA Global Supply website at **[www.GSAGlobalsupply.gsa.gov](http://www.GSAGlobalsupply.gsa.gov)**, click on the “Browse Products” option, and select the “Green Items” tab on the top of the main shopping page. This will highlight a list of all environmentally sustainable items, a list that can be sorted or filtered using specific product attributes or price.

# Specialty Shipping

Complete state-of-the-art storage/shipping system is constructed of heavy-duty AAA-fluted configuration fiberboard sleeve, a plastic top, and a plastic bottom pallet (with four-way entrance capability). The sleeve can be locked with bottom pallet and top to create a rigid and secure system, eliminating strapping and stretch wrapping. The rugged and impact-resistant bottom pallet and top are formed from two sheets of high-density polyethylene. Palletized loads (up to 10,000 lbs.) can be stored up to four high. The 40 x 48" bottom pallet and top have nesting capabilities to save space and stack securely. Reusable system is designed for years of service. Sleeves are collapsible and designed to occupy nearly 30 percent less space than traditional systems.

# Whether your agency is military or civilian, we're ready to support your furniture and furnishings requirements!

GSA's Integrated Workplace Acquisition Center has expanded the categories and styles of furniture and furnishings available through GSA Global Supply™ to include the most in-demand furniture products. Each product line is awarded to be compatible in design so that they can be used together in offices and conference rooms. Every furniture item in this catalog is a GSA Global Supply item that therefore may be requisitioned, regardless of size, from GSA, because GSA has already conducted a competitive procurement that satisfies all Federal Acquisition Regulation (FAR) requirements, including environmental initiatives, trade agreement policies, socioeconomic goals, AbilityOne mandates, and executive orders.

## Delivery

For your convenience, all items in this publication are direct delivery from our industry partners, which provides faster delivery and lower prices to our customers. Delivery times vary by product line. The applicable delivery time for each NSN can be found by searching for the NSN at **[www.GSAGlobalsupply.gsa.gov](http://www.GSAGlobalsupply.gsa.gov)** or at **<http://www.gsaadvantage.gov>**.

Most of the furniture and furnishing items are priced as FOB Destination, so there will be no additional freight charges. However, if the NSN is listed as FOB Origin at **[www.GSAGlobalsupply.gsa.gov](http://www.GSAGlobalsupply.gsa.gov)**, additional freight charges may apply. GSA prices also cover delivery of OCONUS orders for entry into the Defense Transportation System or designated freight forwarder for further routing overseas.

Basic freight is dock-to-dock. GSA prices do not include liftgate service or physically carrying freight up or down stairs

(where delivery is to a floor other than the the loading dock, and there is not an available elevator). Customers may arrange for inside delivery or additional services when they need freight delivered beyond their loading docks, at an extra cost. These rates may be predicated on established contract pricing or may need to be negotiated on a case-by-case basis.

*Tip: For large orders and heavy furniture items, please make sure to include a point of contact and phone number for both the buyer and for delivery on your requisition in the event that questions arise about your delivery location or order. Because some furniture items are very heavy, providing a point of contact and phone numbers will help prevent costly delivery issues.*

If a particular situation warrants a need to contact a vendor or transportation company about your delivery or installation request, please contact the NCSC at (800) 488-3111 or **[ncsccustomer.service@gsa.gov](mailto:ncsccustomer.service@gsa.gov)**.

# Abrasives and Accessories

GSA Global Supply™ provides a diverse line of abrasive products that are primarily used in aircraft maintenance and overhaul depots, naval shipyards, woodworking, vehicle repair and other facilities. Abrasive products are used in conjunction with a variety of power tools. To see the complete offering, visit [www.GSAGlobalsupply.gsa.gov](http://www.GSAGlobalsupply.gsa.gov).

## Aluminum Oxide (A/O)

Primarily used in applications where medium to heavy removal is required. A/O is typically used for de-burring, blending, finishing and removing tool marks on all types of metal and composite surfaces.

## Silicon Carbide (S/C)

A more aggressive abrasive, which will provide a rapid cut and longer working life. S/C is primarily used for grinding very hard materials such as titanium, stainless steel, as well as soft aluminum alloys, plastics and other non-ferrous materials.

## Crocus

An iron-oxide coated abrasive cloth, used as a polishing agent after most of the work has been done with emery or aluminum oxide.

## Emery

Abrasive coated cloth used for light polishing of metal. It is not recommended for large metal surfaces or hard metal, where aluminum oxide cloth is much more satisfactory.

## Garnet

The chosen abrasive for all types of woodworking applications. Garnet is not available in all products, and a finer grit aluminum oxide is recommended as an alternative.

## Choosing a Grit Size

Lower grit size, such as 36, designates more aggressive results than a grit size of 400. The larger the number (600) achieves a finer finish to the material being worked. Definitions are as follows:

- SFN – Super fine
- VFN – Very fine
- MED – Medium
- CRS – Coarse

## Abrasive Aluminum Oxide Disk (Fiber)

Designed for use with portable grinders and sanders and for surface preparation (including removal of paint, scale and rust). Non-waterproof, closed coat disc features a 7/8" arbor hole (without slits or slots).

## Torque Wrench Heads (Interchangeable)

These interchangeable torque wrench heads are cast as a single piece from alloy steel and have a black oxide coating. To achieve constant torque values when changing heads, the exact lever length must be maintained. All heads share a precise distance from end of wrench to center of fastener to maintain a "Common Center Line". The dovetail design used to join the head and wrench provides an exceptionally strong connection and allows complete interchangeability.
